

Hi Client/ Friend

Thank you for expressing interest in the services of our brand.

WEDDING PHOTOGRAPHY/CINEMATOGRAPHY is a Big Deal.....

Wedding photographs are by far the most esteemed treasures of your wedding day. Your spouse is chosen to last for life, and so too are your wedding images, which serve to daily, remind you of that monumental step and gradual transition. Wedding photographs are your point of reference in quiet times, your pride in times of sharing with loved ones and co-workers and your joy as you leaf through

those intimate and beautiful moments, forever sealed in your mind and heart and perfectly documented in your album or on DVD. Once well captured you are guaranteed to never stop looking at them.

Perfectly exposed, creative and technically precise photographs, which are uniquely tailored to clone your persona, are the pride of all brides. Grooms love them too...but the brides...oh the brides.... The character and voice of your wedding story is solely dependent on your choice of Photostoryteller/Brand. This is not a decision that should be trivialized in anyway. Your chosen Photostoryteller should be fun loving, full of life, willing to go the extra mile to facilitate the extreme demands of wedding preparations, patient, practical and most of all is able to ensure that you enjoy your day to the fullest.

In your search for a Photostoryteller, you should never overlook compatibility between your spouse, yourself and the Photostoryteller and by extension the Photostoryteller's compatibility with others. Referrals and testimonials can prove to be very helpful.

The most common mistake of couples seeking a photographer is to use cost alone as the principal factor in hiring. Price is important, but should never over-shadow quality. Simply put the most economical photographer may not necessarily provide the most desirable results. Professionalism, reliability, quality and peace of mind have a price attached and its importance should be well noted. No bride wants to be reminded each time they view their wedding photographs, how poor a decision it was to choose a photographer because the price sounded unbelievably reasonable. A good estimate is to allocate

between 20-25% of one's wedding budget to photography. The drinks, guests, music and food are important by all means but sadly it won't be remembered well if the person chosen to freeze the wedding day beauty ends up melting hearts, dreams and memories. Weddings are never intended to be repeated. Get it right...

Please see our range of package options below, for your perusal. Naalri's Photoplanet is a fun, creative, photostorytelling and cinematography service provider. We eagerly await your response.

## **CUSTOMIZE YOUR OWN PACKAGE....**
